

PACE Aerospace Engineering and Information Technology GmbH with its Milan-based parent company TXT e-solutions S.p.A., is an internationally renowned software company, specializing in innovative software solutions for aircraft manufacturers and airlines. Since its inception in 1995, PACE has been creating and developing software products, configuration options, virtual reality products and leading Green Aviation. The company is based in Berlin, Germany, and has strong ties to partners in the field of aviation worldwide.

Software Engineer

For the **Aerospace Business Unit**, PACE GmbH is looking for a **Software Engineer** to be included in a international team.

Your contribution:

- Being part of an international team that designs, implements and tests safety critical real time embedded software;
- Develop embedded applications, participate and contribute to Software Reviews and applicable documents;
- Design and document the software architecture and the preliminary design;
- Write requirements in compliance with quality criteria, avoiding over- and under-

specification;

- Manage requirement changes, including impact analysis and requirements baseline establishment;
- Verify that the sub-system's, equipment's and component's requirements are correctly and completely implemented.

What you know:

- Knowledge of computer systems and technologies;
- Good knowledge of software engineering;
- Solid knowledge of C++;
- Good knowledge in software life-cycle;
- Business Proficiency of English language;

What will enchant us: Knowledge of DOORS and Python will be considered a plus, together with a good knowledge of the German language.

A Master's degree in Aerospace or Computer Science Engineering, Computer Science.

The profile is completed by ability to teamwork, communication, networking, work independently and self-motivated.

Why choosing TXT Group?

- We offer a **contract commensurate with the experience** and the possibility of experimenting in an international context.
- Unique Career opportunities in a fast-growing and profoundly changing company with young and international staff;

- Flexible schedule, hybrid working possibilities
- Exciting Team Building and Company Events

We are committed to diversity and equal opportunities. This position is open to applicants of all genders (m/f/d)
