## Software Engineer (m/w/d)

[Apply](#) Unterschleissheim Full time Posted 2 Days Ago End Date: September 9, 2025 (18 days left to apply) 560422

### Job Title

Software Engineer (m/w/d)

### Job Description

Join the **Clinical Applications Engineering team of Philips Ultrasound** to enhance viewing capabilities and develop medical quantification tools.

We work in an agile development environment, and our medical products are integrated on ultrasound carts and workstations. In this role, you will work with a modern C++ technology stack, applying best practices, methods, and techniques of modern software development.

### Your role:

- Work in an agile team to develop medical 2D/3D/4D review and quantification tools for medical image data

## Software Engineer (m/w/d)

Apply

- Master degree or equivalent in Computer Science
- Team player in an agile software development team
- Strong proficiency in modern C++ (C++17+) and corresponding technology stack
- Solid understanding of API design and common software design patterns
- Solid understanding of modern development techniques, Agile practices, and software quality
- Nice to have knowledge of DICOM, and proficiency in Angular and TypeScript

**Geography:** The role is based in Munich, Germany.

**Application Deadline:** September 9th

**How to apply:** Please apply online using the link.

### How we work together

We believe that we are better together than apart. For our office-based teams, this means working in person at least 3 days per week.

This role is an office role.

### About Philips

We are a health technology company. We built our entire company around the belief that every human matters, and we won't stop until everybody everywhere has access to the quality healthcare that we all deserve. Do the work of your life to help the lives of others.
